Subject: Microsoft Settlement

Hello and thank you for listening.

I would like to state that I do not believe that the DOJ's settlement with MicroSoft is the best idea. MicroSoft as a company has shown too much disregard for the public and government already. They seem to believe that they are above the law.

Please do not allow them to continue their path of market domination and control. This is another example of America not paying attention. We will become as dependant on MicroSoft as we have been to Middle Eastern oil. And look where that has taken us.

Thank you again for listening.

Respectfully,
Matthew R. Ross
